

1  **Camden May 13, 2008**  
**CBM Course live burn**  
**by**  
**Paul Wingard**  
**at**  
**Coastal Plains Substation**

2  **Demo burn for CBM Course**  
**fire weather forecasts**

- 30 year old loblolly that had been salvaged for storm damage
- Stand was burned with a light burn 2 years before
- Forecast temp 84 F
- RH 40%
- Fuel moisture 11%
-

- 3 
- 4 
- 5 
- 6 
- 7 
- 8 
- 9 

10  **Ignition complete by noon**  
**Burn out complete by 5 PM**  
Burn was allowed to back through the entire stand

11  **Other burn**

- Another growing season burn done by the Wilcox County AFC staff
- Objective: reduce understory brush without scorching the canopy
- Note the scorch on the young loblolly saplings – will they survive ?

- 12 
- 13 

14  **Good growing season burn ?**

- No scorch on over story crop trees ?
- Apparent good control of understory brush .. To be determined at a later date
-
